Here's a low priced GRAFLEX quality camera designed for picture-making pleasure. The easy-to-use new Century GRAPHIC has many of the famous features that have long made the Speed GRAPHIC the favorite of press and commercial photographers. A big plus feature is the new GRAFLOK back which allows you to use sheet film, film packs, and roll film interchangeably for album-sized $2\frac{1}{4} \times 3\frac{1}{4}$ pictures and negatives that can be blown up to huge needle sharp enlargements. The Century GRAPHIC is fitted with an outstanding color corrected lens, the new GRAFLEX 103mm f/4.5 Trioptar, coated for added efficiency. This fine lens is mounted in the new Century shutter with built-in flash synchronization at all speeds.

***Although 6" approximates the diagonal of a 4 x 5 negative, many news photographers and other GRAPHIC users prefer the greater angular coverage and depth of field of 127 mm and 135 mm lenses (5" and 5 1/4") stopping down to make the corners sharp or ignoring the slight unsharpness at the corners of full aperture. The same is true of 11.3 cm (4 1/2") lenses on the 3 1/4 x 4 1/4 GRAPHIC Cameras.

Shutter Symbols: gxs—Graphex Shutter with built-in synchronization. gss—Supermatic Shutter with built-in synchronization
